

The Art of Observation Professional Learning Community

“The best way to understand the development of children is to observe their behavior in natural settings while they are interacting with familiar adults over prolonged periods of time.”

Urie Bronfenbrenner

Observation is truly an art that can transform your teaching. This quarterly PLC will provide an opportunity for early educators to hone their skills in observing, documenting, and assessing children’s development. Members will read and discuss sections from *The Art of Awareness: How Observation Can Transform Your Teaching* by Deb Curtis and Margie Carter, which will be provided. Come share your strategies, insights, and desire to build your expertise with like-minded colleagues. There is no charge for participation, and training hour certificates will be provided.
